SHELTER UCITS - VDK SUSTAINABLE FLEX FUND Fund, a sub-fund of the SICAV Shelter UCITS

(ISIN: LU1520990026, R EUR A ACC)

Objectives and Investment Policy

Investment Objective:

The objective of the sub-fund (the “Fund”) is to aim to provide investors with a positive return versus its benchmark, a combination of 70% MSCI World (in EUR) and 30% Eonia Index (in EUR) (the “Benchmark”), over a 5-year period whilst maintaining a level of volatility that is below the Benchmark volatility level.

Investment Policy:

The Fund will invest in a portfolio of global listed stocks, selected from a sustainable/ethical investment universe, based on a multi-factor selection process combined with a variable market exposure hedged through derivative instruments. To achieve the Investment Objective and without seeking any overexposure through long/short positions, stocks that could outperform the markets are directly bought and derivatives on one or more equity indices (EUR hedged) are directly sold such as return results directly from the difference between the stocks’ performance and the equity indices (EUR hedged) performance.

The Benchmark is solely used as a reference to compare the performance of the sub-fund but not for the construction or choice of constituents in the sub-fund’s portfolio. For this reason, the sub-fund’s portfolio. For this reason, the sub-fund’s portfolio will strongly differ from the Benchmark.

The Fund may use financial derivative instruments and OTC in order to manage the portfolio efficiently and to gain indirect investment exposure. The Fund may hold cash on an ancillary basis. The Fund may not borrow for investment purposes. However, it may borrow up to 10% of its net assets on a temporary basis for liquidity purposes.

Shareholders may redeem shares on any dealing day in Luxembourg. Any income earned by the Fund will be retained and reflected in an increase in the value of the shares (accumulation).

The shares of this share class are issued in EUR.

Risk and Reward Profile

The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. The Fund has this rating due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund’s investments or expose the Fund to losses.

- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.

- The value of equities and equity-related securities can be affected by daily stock market movements.

Other influential factors include:

- political, economic news, company earnings and significant corporate events.

Particular risks not adequately captured by the risk indicator include:

- Counterparty Risk: the insolvency of any institutions acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Operational Risk: the insolvency of any institutions providing services such as safekeeping of assets may expose the Fund to financial loss.
- Currency Risk: the Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.

For more information on risks, please see the Fund’s prospectus.
